MULE

MULE

Suspended, light and robust

The suspended and single-wheeled luggage trailer is a unique product for off-road and on-road cycling and ideal for bicycle touring. Also for mountain bikers who are crossing the Alps or those who just want to take their bike on an unsupported trip with luggage, the Mule is the perfect means of transportation. Having reached your

destination the Mule can easily be detached and the mountain bike can be used for local trips. Because of its width of only 45 cm and its single-wheeled design even serpentine can be coped with little efforts.

«The mule trailer is a well-made and reliable cycle touring companion that we would recommend to anyone planning a long distance cycle tour.»

World Record Long Distance Ride 11/15

«This single-wheeled trailer is a very well thought out trailer. The drivability is amazing: light, easy to handle, precise and spring mounted. My favourite trailer.»

Cyclelogistics EU project 05/12

«I've been really enjoying using the trailer. It rides great, and is so easy to deal with off the bike. My favourite trailer so far!»

Cass Gilbert, whiteoutriding.com 09/11

Compatible with 29" bikes

Permissible maximum weight 45 kg

Simple and easy handling because of lightweight: only 6.7 kg

Adjustable spring travel of 160 mm (off-road) or 120 mm (street)

Can be easily disassembled and stored flat

Single-wheeled design enables dynamic riding qualities with a load

Center of gravity optimization of luggage for different usage models. Lower balance point and reduced ground clearance for street usage, higher balance point and ground clearance for off-road usage

Mudguard

Kickstand

Inside bag
